
Evidence and Interpretation Notetaker

Purpose: The Evidence and Interpretation Notetaker supports knowledge-building within a text and across multiple texts. As you read individual texts you will have “ah-ha” moments, when an idea in the text helps you to create a new understanding, make a new connection, pose a new question, or uncover a new puzzlement – all of which are essential for building science knowledge. The notetaker is where you can gather and record critical ideas, both evidence from the text and your ideas about the evidence from the text. As you work to synthesize information into a coherent understanding, you can eventually work from your notetaker and re-read the texts only when needed.

Source	Evidence	Interpretation
Title page #	Identify ideas from the texts that may relate to the driving question of the investigation. Record those ideas here.	Explain why you <i>think</i> the idea relates (or possibly relates) to the driving question.
